

Condition Monitoring Products

FAG SmartCheck

High process security by means of decentralised machinery monitoring

FAG SmartCheck is the innovative device for ensuring the availability of all machines – today and tomorrow!

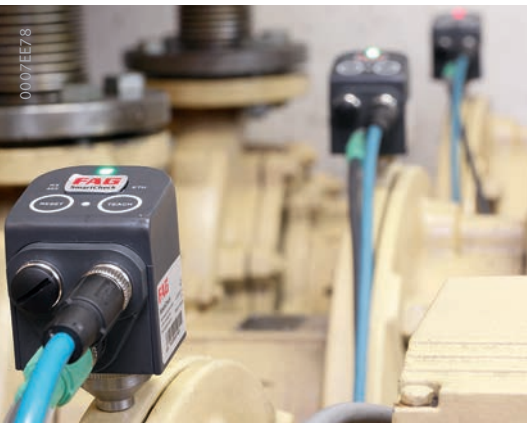

**The benchmark
in machine
monitoring**

- Easy to operate and integrate into existing systems
- Unique price/performance ratio
- Applicable as condition guard
- Optimizing maintenance intervals and reducing costs

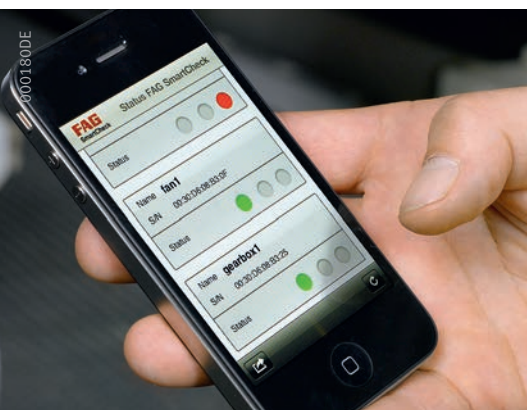

Condition Monitoring

Easy installation and commissioning

Pump monitoring with FAG SmartCheck

SmartPhone as alarm receiver

Field of applications

- Electric motors and geared motors
- Vacuum and fluid pumps
- Ventilators and fans
- Gearboxes and compressors
- Spindles and machine tools
- Centrifuges
- Vibrating screens
- Cableways

Operating benefits

- **Reliable real time monitoring on your machine**
Innovative vibration sensor with diagnosis technology
- **Intelligent process monitoring**
Recording of different process parameters and correlation with vibration signals
- **Intuitive operation**
Automatic adjustment of alarm thresholds thanks to self-learning mode (plug and play option), LED error indicator, direct data retrieval at the FAG SmartCheck using Internet Explorer oder Firefox
- **Easy integration into control system and station**
Analog and digital inputs and outputs as well as ethernet protocols (TCP / IP, UDP / IP, SCMP, Web services)
- **Versatile accessories**
FAG SmartLamp indicates the alarm status from a distance, FAG SmartConnectBox for the easy distribution of additional signals, FAG SmartController Gateway for direct integration into control level, for example by means of Modbus/TCP
- **Full service from a single source**
Consulting, commissioning, remote service, maintenance contracts and training courses
